

CONFIDENTIAL

Clean Scheduler

5-Year Business & Growth Plan

Multi-tenant operations platform for residential and commercial cleaning businesses

Prepared: June 2026

Horizon: 2026 – 2030

Executive Summary

Clean Scheduler is a vertical SaaS platform purpose-built for residential and commercial cleaning companies. The product consolidates quoting, crew scheduling, invoicing, customer communication, payroll-ready reporting, and a branded customer portal into one workspace — replacing the patchwork of spreadsheets, group texts, and generic field-service tools that most cleaning operators use today.

The company operates a tiered subscription model (Starter \$39/mo, Business \$129/mo, Pro \$299/mo) with a 7-day free trial. v1.x is live in production with core revenue workflows operational: quotes-to-schedule, recurring visits, Stripe Connect payments, month-end close, and growing differentiation through cleaning-specific features such as bank deposit reconciliation, proof-of-service photos, referral programs, and an integrated marketing website CMS.

This plan outlines a five-year path from early commercial traction to category leadership in cleaning-industry operations software, targeting \$15M+ ARR by 2030 through focused vertical GTM, product depth competitors cannot easily replicate, and expansion into adjacent revenue streams (payments, SMS, and add-on seats).

Company & Product Overview

Mission: Give every cleaning business — from solo operators to multi-location franchises — one operational system that is lean to run and professional for customers.

Product architecture: Single Next.js deployment serving marketing site, tenant operations portal, unified customer portal, and founder admin — multi-tenancy enforced via Postgres Row-Level Security on Supabase.

Core capabilities (shipped or in active rollout)

- Quotes pipeline with Kanban stages, line items, and quote-to-schedule automation
- Day/week schedule with recurring visit rules, crew assignment, and customer reschedule requests
- Invoicing, manual payment recording, and Stripe Connect (cards + ACH)
- Branded customer portal with invoices, visit history, and messaging
- Email campaigns, customer promotions, and referral program
- Payroll exports, compensation rules, tips/commissions (job costing)
- Bank deposit reconciliation via Plaid (Zelle/ACH matching)
- Tenant marketing website CMS with SEO pages and inbound lead capture
- Custom roles/permissions, platform support tickets, and founder accounting views

Market Opportunity

The U.S. cleaning services industry includes tens of thousands of residential and commercial operators, most under 50 employees. Field-service incumbents (Jobber, Housecall Pro, ServiceTitan) serve broad trades; none optimize end-to-end for cleaning workflows — recurring visit logic separate from billing, consultation-to-quote flows, proof-of-service, and bookkeeper-friendly month-end close.

Vertical SaaS in niche trades consistently achieves higher retention and willingness-to-pay than horizontal tools. Cleaning businesses spend on software when it directly reduces no-shows, speeds quoting, and improves cash collection. TAM for U.S. cleaning ops software is estimated at \$500M–\$1B annually; SAM focuses on 50,000–100,000 businesses with 2+ employees and digital billing needs.

Competitive Positioning

Clean Scheduler competes on depth for cleaning operators, not breadth for all home services. Key differentiators: (1) quote-to-recurring-schedule in one flow, (2) bookkeeper-grade reconciliation and month-end close, (3) customer portal + marketing site under one brand, (4) transparent flat pricing without per-job fees, (5) operational lean design — fewer clicks for daily office work.

Primary alternatives: Jobber/Housecall Pro (generalist, higher price at scale), spreadsheets + QuickBooks (cheap but fragile), and pen-and-paper (majority of micro-operators). Win strategy: dominate cleaning-specific SEO, community partnerships (franchise networks, supplier co-marketing), and case-study-driven proof of ROI.

Business Model

Revenue: Monthly/annual SaaS subscriptions by tier. Annual billing offers ~20% discount. Future add-ons: extra office/field seats, SMS/message packs, additional marketing site pages, and white-glove onboarding.

Payments: Stripe Connect platform fees on tenant customer transactions (optional revenue stream as GMV scales).

Unit economics targets (Year 3 steady state): CAC payback < 12 months, gross margin 80%+, net revenue retention 105%+, logo churn < 3% monthly on Business+ tiers.

Five-Year Growth Targets

Metric	2026	2027	2028	2029	2030
Paying tenants	150	500	1,500	3,500	7,000
ARR (\$M)	\$0.4	\$1.2	\$3.5	\$8.0	\$15.0
Avg revenue/tenant/mo	\$95	\$105	\$115	\$120	\$125
Team (FTE)	3	8	18	35	55
NPS target	40+	45+	50+	50+	55+

Year-by-Year Plan

2026 — Foundation & First 150 Customers

- Complete G2, Capterra, and cleaning-community launch; publish 10+ customer case studies
- Ship SMS (Pro), Plaid reconciliation GA, marketing site custom domains, mobile PWA for field staff
- Establish inside sales + self-serve trial funnel; target 40% trial-to-paid conversion
- Founder-led customer success for first 50 accounts; document repeatable onboarding playbook
- Apply SOC 2 Type I readiness; column encryption for tenant PII

2027 — Scale GTM & Business Tier Dominance

- Hire 2 SDRs + 1 marketing lead; invest in cleaning-specific SEO content hub (500+ pages)
- Launch partner program: cleaning franchises, chemical/supply distributors, bookkeeping firms
- Ship API/webhooks GA, advanced analytics dashboard, and scheduled email campaigns
- Introduce seat/add-on billing in product; expand to Canada (English) as first international market
- Target Business tier as 60%+ of new ARR; Pro for 10–20 crew operations

2028 — Product Moat & Mid-Market

- Multi-location controls, franchise rollup reporting, and consolidated billing views
- AI-assisted quoting (square footage / room-based estimates) and schedule optimization
- Marketplace integrations: QuickBooks Online bi-sync, Gusto/ADP deep links, Angi/HomeAdvisor lead import
- Customer community + certification program (“Clean Scheduler Certified Operator”)
- Expand CS team; launch Pro concierge onboarding package (\$2,500 one-time)

2029 — Category Leadership

- 1,500+ paying tenants; recognized top-3 in cleaning software review sites
- Launch mobile apps (iOS/Android) for field check-in, photos, and offline schedule
- Explore commercial/janitorial module: work orders, inspection checklists, client portals per building
- Payments GMV milestone: \$50M+ annual processed volume through Stripe Connect
- Series A or profitable growth decision based on NRR and CAC efficiency

2030 — Platform & Ecosystem

- 7,000 paying tenants; \$15M ARR; path to \$25M ARR visible through upsell and international
- Third-party app marketplace (background check, insurance, supply ordering)
- White-label / franchise edition for master franchise brands
- Evaluate UK/AU expansion; hire regional success leads
- M&A optionality: acquire complementary tools (review management, hiring) or strategic partnership

Go-to-Market Strategy

Primary channels: (1) Product-led growth via 7-day free trial and in-app upgrade prompts, (2) SEO/content targeting “cleaning business software,” scheduling, and invoicing keywords, (3) Review site presence (G2, Capterra), (4) Referrals from accountants and cleaning coaches, (5) Paid search on high-intent terms once LTV:CAC > 3:1.

Sales motion: Self-serve for Starter; light-touch demo for Business; white-glove for Pro. No enterprise field sales in Years 1–3 — focus on businesses with 2–30 employees.

Brand: “Run your cleaning business from one console.” Emphasize bookkeeper and office-manager personas alongside owner.

Product Roadmap Themes (2026–2030)

Theme	Priority years	Outcome
Core ops excellence	2026	Best-in-class quote !' schedule !' invoice loop
Customer experience	2026–27	Portal, SMS, marketing site, proof photos
Financial ops	2026–28	Reconciliation, tax, payroll, multi-entity reporting
Growth tools	2027–28	Campaigns, referrals, promos, lead capture
Platform & API	2027–29	Integrations, webhooks, partner ecosystem
Mobile & field	2028–30	Native apps, offline, GPS/check-in
Commercial / janitorial	2029–30	Expand TAM beyond residential

Organization & Hiring Plan

Years 1–2: Founding team + first engineer, customer success, and marketing generalist. Stay remote-first with async culture; prioritize tenant support response SLAs by tier.

Years 3–4: Engineering pod (platform, product, mobile), dedicated support tiers, data/analytics hire, partnerships manager.

Year 5: VP Sales/Marketing, regional success, compliance/security lead as customer count and PII scope grow.

Key Metrics & Milestones

- North star: Weekly active tenant operators (office users logging in 3+ days/week)
- Activation: First quote sent + first visit scheduled within 14 days of signup
- Retention: 90-day logo retention > 85% on paid plans
- Expansion: 25%+ of Business tenants upgrade to Pro within 24 months

- Support: Median first response < 4 hours (Business), < 1 hour (Pro)

Financial Outlook (Summary)

Assumptions: 70% Starter / 25% Business / 5% Pro mix shifting to 40/45/15 by 2030; 15% annual price increases on new signups; infrastructure COGS ~8% of revenue at scale.

Break-even target: Month 30–36 on operating expenses excluding founder below-market comp. Funding: bootstrap through \$1M ARR; evaluate \$2–4M seed/Series A if growth rate exceeds 15% MoM and payback stays under 12 months.

Use of funds (if raised): 50% GTM, 30% product/engineering, 15% CS/onboarding, 5% compliance.

Risks & Mitigations

Risk	Mitigation
Slow trial conversion	In-app onboarding checklist, concierge calls for Business trials
Incumbent price pressure	Vertical depth, bookkeeper partnerships, switching cost via portal
Support load at scale	Help center, AI support triage, tiered SLAs, CS hire ahead of growth
Payment/compliance burden	Stripe Connect abstraction; SOC 2; legal review for SMS/PII
Feature sprawl	Roadmap tied to cleaning personas; say no to non-vertical requests

Conclusion

Clean Scheduler is positioned to become the operating system for cleaning businesses by staying narrow, going deep, and earning trust with office managers and bookkeepers — not just owners. The next five years focus on repeatable acquisition, product moats that horizontal competitors cannot copy quickly, and disciplined expansion into payments, mobile, and mid-market commercial workflows.

Success in 2030 looks like: thousands of cleaning companies running daily operations on Clean Scheduler, strong word-of-mouth in cleaning communities, and a platform ecosystem that makes switching unthinkable.
