

CLEAN SCHEDULER SALES

A simple look at the role, the pay, and the goals

Clean Scheduler

**Sell cleaning-company software.
Get paid when companies say yes.**

You work for yourself. Great as extra income. We write the pay terms down before the first demo.

Prepared: September 2026

The simple idea

Cleaning companies quote the job, put crews on the calendar, send the invoice, and let customers pay from the same place. That is Clean Scheduler. It already works.

Your job is to get it in front of cleaning companies and help them say yes. You get paid for the companies you bring in and close. Chris builds the product, sets each company up, and helps after they buy. You both sell. A shared board shows who gets credit.

As you build a book of companies, we can talk about a longer setup.

What you sell

Aim for Business yearly. That is the plan with the customer portal, crews, and month-end. Companies get 7 days free to try it. Chris joins the first setup call with you.

Plan	Each month	Whole year	What they get
Starter	\$39	\$374	Small team. Schedule, quotes, invoices. Fallback.
Business	\$129	\$1,236	The one to sell. Portal, crews, month-end.
Pro	\$299	\$2,870	Multi-location or heavier ops. White-glove.

How you get paid

When a company you brought in pays, you get 25% of the money they pay in year one. On Business yearly that is \$309 the day they pay.

You also get \$12.90 each month for 24 months while they stay. That is \$154.80 in year one and \$154.80 in year two. One yearly company is about \$464 in year one, about \$619 over two years if they stay.

The name on the lead in the sales board is who gets paid. If a brand-new company cancels in the first 90 days, we adjust that commission so it stays fair.

If they pay monthly instead

Yearly is the close we want. Monthly still counts. You get paid when they pay us — not on a promise. On Business monthly (\$129 each month), 25% of year-one payments is \$32.25 each month for 12 months (\$387 if they stay the year). Residual is the same either way: \$12.90 each month for 24 months while they stay.

	Yearly (aim here)	Monthly
They pay	\$1,236 the day they buy	\$129 each month
Your 25%	\$309 that day	\$32.25 each month in year one
Residual	\$12.90 / month for 24 months	Same
Year one if they stay	About \$464	About \$542
Two years if they stay	About \$619	About \$697
If they cancel in month 6	About \$386	About \$271

Monthly can pay you a little more over two years because they did not get the yearly discount. You still sell yearly: cash in the door on day one, and they are more likely to stay.

Goals

These are goals. Take your time and stack companies.

Goal	What it means	About what you earn
First 4 companies	Four Business yearly closes	About \$1,370 along the way, \$1,855 over year one, then about \$620 more in year two if they stay
Goal: 2 companies / month	A strong extra-income pace	About \$9,400 in year one, about \$14,800 once residual is full, about \$67,000 over five years
Stretch: 4 companies / month	A big year	About \$18,900 in year one, about \$29,700 once residual is full, about \$134,000 over five years

First 4 companies — how the money adds up

One Business yearly every few weeks.

Company	Your check that day	Companies so far	Extra each month	Money so far
1. Gulf Coast Cleaning	\$309	1	\$12.90	\$322
2. Palm Bay Maids	\$309	2	\$25.80	\$657
3. Sunset Sparkle	\$309	3	\$38.70	\$1,005
4. Harbor Edge Janitorial	\$309	4	\$51.60	\$1,366

Goal pace — 2 companies a month for a year

Each month you add about \$618 from new closes, plus a little more from companies that already bought.

Month	Companies so far	That month	Money so far
1	2	\$644	\$644
3	6	\$695	\$2,009
6	12	\$773	\$4,250
9	18	\$850	\$6,723
12	24	\$928	\$9,428

Five years if you keep the pace

Residual on each company lasts 24 months, then it stops. Year two is still growing. From year three the residual book is full if you keep the pace. Figures assume Business yearly, and that those companies stay.

Year	Goal: 2 / month	Stretch: 4 / month
1	\$9,428	\$18,857
2	\$13,144	\$26,287
3	\$14,846	\$29,693
4	\$14,846	\$29,693
5	\$14,846	\$29,693
Five-year total	\$67,111	\$134,223

Keep closing to keep the yearly number. Residual on each company lasts 24 months — not the life of the account.

How we work together

- You find companies, book demos, tell the story, and collect the first payment.
- Chris keeps selling too, sets companies up, and helps them after they buy.
- Clean Scheduler gives you a first-metro list, a live demo, and a 7-day free try.

Who you call

Talk to the owner or office manager at a 2–30 person residential or commercial cleaning company. One metro at a time. The line is: run your cleaning business from one console.

Show Business. Show a quote, next week's schedule, and an invoice the customer can pay. Yearly is the close we love. Monthly still counts.

Next step

If this sounds like a good extra-income role, we write the pay terms down, you get the demo login and a first-metro list, and we put the first three demos on the calendar. Then we go get those first four companies.
